## **Project Details**

### **Project #1**

**Project Name-** Sobeys.inc

**Software** - Apex, Integration, Lightning components, LWC, sales and service cloud, CPQ

**Environment-** Salesforce Developer Console.

Sobeys Inc., a major Canadian grocery retailer, needed a centralized and automated quoting system to support its B2B sales team. The objective was to implement Salesforce CPQ on top of their existing Sales Cloud environment to streamline the configuration, pricing, and quoting process for commercial equipment and services provided to partner stores and franchisees.

## **Responsibilities**

### **Salesforce CPQ Implementation:**

- Designed and implemented product catalog, including complex product bundles for grocery equipment and service packages.
- Configured pricing rules, discount schedules, and approval processes based on deal size and customer segment.

- Created custom quote templates to align with Sobeys' brand standards and legal requirements Integration with Sales Cloud.
  - Integrated CPQ with Leads, Opportunities, Accounts, and Contracts to ensure a seamless end-to-end sales process.
  - Enabled sales reps to generate quotes directly from opportunities, with real-time pricing and configuration validations.
- Involved in various activities of the project, like development meetings, requirement gathering, and analyzing requirements, documenting the functional and non-functional requirements.
- Responsible for all the data in Org (updating, insertion, maintenance)
- Worked on three integration API that communicates with an external system.
- Developing Apex Classes and lightning components and LWC.
- Developing apex triggers as per requirement
- Writing Test Classes and increasing existing test coverage.
- worked on building community pages using LWC
- Responsible for deploying the code from Sandbox to testing and production Environments
- Assisted in troubleshooting integration issues.
- Acted as a Mentor guiding the team members to provide insights and follow the best practices.
- Served as the primary point of contact in the project to handle test classes and development-related discussions.
- Provided support for production applications post-deployment and guided other project team members with their solution development.
- Assisted project managers and business analysts in defining the technical skills, estimates, and dependencies.

## **Project #2**

**Project Name-** Waste Management

**Software** - Apex, Integration, Lightning components, LWC, sales and service cloud

**Environment-** Salesforce Developer Console, Community Cloud, and Visual Studio code.

### **Responsibilities:**

- Involved in complete design, and requirement analysis of the integration from scratch.
- Involved in various activities of the project, like development meetings, requirement gathering, analyzing requirements, and documenting the functional and Non- non-functional Requirements.
